

## **Pats Horn**

On the Icy Hill chase, there are two runways, just in from the Axe Handles, in an area called "Pat's Horn". Pat Comerford relates that, one time, he shot at a buck there. The buck was a long ways off and the shot was more to warn the guys out on the road that it was coming than an effort to hit the deer. However, he shot the horn off the deer and didn't realize until the next day. Jerome was putting out a chase and found the horn. Then they found traces of blood and were able to follow the trail for a bit but never found the buck. Pat says there's no use looking for him anymore though. "You're not going to get him now. That must have been 30-35 years ago." (November, 2008)
